

Water Safety and Crisis Management: Business Continuity Essentials for Disaster Risk Management Program Launch in the Czech Republic

in cooperation with:

13 January 2021, 14:00 – 15:30 CET

Location:

virtual

Objective: Lack of response mechanisms to pollution outbreaks and increasingly frequent natural disasters such as floods, droughts as well as pandemics hinder the ability of water supply utilities to sustainably provide their services, hence posing a risk to national public health. Through this program, supported utilities learn how to identify operational hazards and how to plan, prepare and respond to these incidents for fast response and recovery in the event of a crisis or disaster. In addition, practitioners receive practical scenario-based training for decision-making under uncertainty. Further information on the program can be found [here](#).

This event will present the **Water Safety and Crisis Management Program (WSP*)** to the stakeholders of the Czech water sector and introduce testimonials from other WSP Hubs, which have already participated in the program delivery.

Remark: *WSP is the abbreviation of the program and does NOT stand for “Water Safety Plan”!

Registration: To join the meeting, please register yourself [here](#).

AGENDA

Time	Session Details	Responsible Person(s)
14:00 – 14:10	Welcome and introduction <ul style="list-style-type: none"> – Welcome words – Agenda and objectives 	Mr. Walter Kling, IAWD President and Mr. Christian Hasenleithner, Energie AG Bohemia
