

Terms of Reference

Call for Proposal and Terms of Reference for Assets and Asset Management Trainer for the Utility Governance Program

I. Background

IAWD is an association of water and wastewater utilities in the Danube region. It was established in 1993 by utilities from 7 countries with the objective of promoting joint national and international efforts to avoid and reduce risks to water supply, such as pollution and other types of harm to the condition of the Danube, its tributaries, and related groundwater resources. IAWD is a not-for-profit association formed under the Austrian Association Law with headquarters in Vienna, Austria. Since 2013, IAWD runs, together with the World Bank the Danube Water Program (DWP) providing support to water utilities and other members of the water sector in the Danube Region. IAWD provides a platform to exchange information and knowledge and to facilitate peer to peer communication and cooperation among water utilities, organizes conferences, meetings, and capacity development programs for participants of the Danube Region and the neighbouring countries. IAWD is receiving a grant for the project “Fostering water and sanitation service provision in the Western Balkans through capacity development and cooperation by maximizing synergies between RCDN and D-LeaP” (Danube Learning Partnership).

The project “*Regional Capacity Development Network (RCDN) for Water and Sanitation Services*” aims at increasing the effectiveness and efficiency of the Associations of Public Utilities (APUCs) and of Local Governments (LGAs) in the six Western Balkan countries, which contributes to better service provision for and by their members, ultimately allowing to deliver equitable, safely managed drinking water and sanitation services to the population, in line with international standards.

The project is jointly financed by the Swiss State Secretariat for Economic Affairs (SECO) and the German Federal Ministry of Economic Cooperation and development (BMZ), and it is administratively embedded in the GIZ Project “Open Regional Fund for Southeast Europe - Modernisation of Municipal Services (ORF MMS)”, commissioned by BMZ.

Four key sets of activities will contribute to achieve the RCDN project outcomes:

- **Outcome 1:** (Stronger associations). APUCs and LGAs are capable to perform their organisational functions in line with their mandate.
- **Outcome 2:** (Adequate capacity development offer). APUCs and LGAs are capable of responding satisfactorily to the water sector-related capacity development needs and requests of their members.
- **Outcome 3:** (Policy dialogue led by associations). APUCs and LGAs are recognised by competent national agencies, able to establish strategic collaborations, and to facilitate policy dialogue in order to advocate for the interests of their members
- **Outcome 4:** (Regional services). Regional capacity development services address the needs and requests and add value to the capacity development offer of APUCs and LGAs.

The RCDN builds upon and integrates the existing CD activities, on national and as well as regional levels, and facilitates scaling-up and further replication throughout the region. Strengthening capacities of associations for collaborative CD delivery is core of the methodological approach. The project will provide the necessary assistance for introducing and enhancing functional capabilities, procedures and instruments that shall allow the RCDN partner associations to deliver fee-based CD products to water utilities and municipalities in an effective manner.

RCDN will embrace institutional and capacity development support to 15 national associations of water utilities and of local governments, as well as two regional associations, namely the International Association of Water Service Companies in the Danube River Catchment Area (IAWD) and the Network of Associations of Local Authorities of South-East Europe (NALAS), and two associations of professionals, Aquasan and the Association for Water Technology and Sanitary Engineering in Serbia (UTVSI).

IAWD is an association of water and wastewater utilities in the Danube region. Established in 1993, IAWD is a not-for-profit association formed under the Austrian Association Law with headquarters in Vienna, Austria. Since 2013, IAWD and World Bank jointly implement with the World Bank the Danube Water Programme (DWP) providing support to water utilities and other members of the water sector in the Danube Region. With the support of the DWP, IAWD has been able to create a partnership with national APUCs in the region to regionally develop and deliver a range of capacity building programs on national level in local language, i.e., the Danube Learning Partnership (D-LeaP). Among them is the Utility Management Training, a foundation program under D-LeaP, which has been designed as a master class for holistic management in the water service sector.

Utilizing the already-developed D-LeaP programs and in partnership with leading utilities in Central and Eastern Europe, the Utility Management Training aims to “equip” current and future water-sector managers with tools and techniques to support their decision making. The World Bank as institutional partner offers the Utility of the Future (UoF) program, which is designed to catalyse, materialize, and maintain transformation efforts in Water Supply and Sanitation (WSS) utilities. The academic partner, Sofia University, further brings academic structure and rigour to the program and allows for the collection of ECTS credits. Based on a shared understanding that municipalities, central and regional authorities would benefit from a deeper understanding of utility governance mechanisms, the “Utility Governance Program” is developed as a concise program based on selected modules of the already existing UMT. This new program combines topics such as financial management of water utilities, organizational structuring, supervision and control, asset management and investment planning, regulatory and contractual models, tariff structures and utility economics (among others).

In the previous RCDN grant period, IAWD has adjusted the two modules of the D-LeaP program “Utility Management Training” to create the Utility Governance Program (hereinafter “UGP”). The objective of the UGP is knowledge gaining and capacity building for local government unit (LGU) representatives, and enhanced cooperation between LGUs and their local public utility company (PUC). UGP enables Local Self-government Units representatives to have a better overview of the performance of the Water Utility in their municipality and therefore can identify where improvements are needed. In this grant period, IAWD plans to engage the program coordinator, who will implement and facilitate the program further.

II. Aim of the Assignment

UGP is designed as a three-days program building wider awareness in utility governance processes, among them financial control and corporate/organizational governance of public utility companies, regulation and tariffs, energy efficiency, investment, asset planning, etc. Target audience of the UGP are representatives of local authorities (LGUs/municipalities) and/or regional administrations (governors' offices, etc.) who are directly or indirectly involved in the corporate governance of water utilities.

In October 2022, online pilot delivery of the UGP has been organized. The purpose of the delivery was to gather relevant stakeholders from water utilities and local government representatives and receive their input on the content of the UGP. The content has been adjusted based on those inputs.

The aim of the trainer's assignment is to (1) develop a set of training materials tailored to the UGP agenda in its sessions related to Assets and Asset Management by adapting available UMT materials and applying, where relevant, additional ones, (2) deliver the trainings (either onsite or online, to be further coordinated) within the relevant sessions of the UGP training itself.

The delivery of the training will be in line with the Quality Standards. All necessary Annexes and templates will be provided to the trainer.

III. Responsibilities and tasks of the consultant

According to its aim, the assignment consists of two main sets of activities:

- 1) Adapt and develop training materials
- 2) Deliver the trainings

1) Set of activities referring to adaptation and development of training materials

As a part of this set of activities, the consultant is obliged to:

1. Review available materials from Cycle 2 of the UMT and identify relevant content
2. Adapt (shorten) materials and, where relevant, apply use cases and other relevant materials
3. Develop additional content where considered feasible for the specific audience of the UGP (i.e. higher focus on municipal and regional authorities involved in a stakeholder relationship rather than deeper-dive utility experts)

Deliverables of this set of activities:

- A set of materials – one core material for each session of the trainer
- A list of reference readings, links, case studies where applicable

2) Set of activities referring to trainings delivery

1. Actual delivery of the training sessions as per the agenda
2. Participation, if and where feasible, in other UGP sessions that relate to the topics of Assets and Asset Management

3. Participation in potential introductory and follow-up activities with the program organizers and the UGP participants

Deliverables of this set of activities:

- Actual delivery of the planned training sessions within the UGP residential week (note: delivery can take place onsite or online – to be further agreed between the organizer’s team and the trainer)
- Participation in introductory of follow-up activities around the UGP week

Notes: The exact order of the tasks will be agreed with IAWD.

Costs for travel and accommodation related to the training will be reimbursed/covered by IAWD based on the Contract. The contract between IAWD and the selected consultant will be signed separately, under the laws of Austria.

IV. Expert Days

Maximum 8 days are foreseen for the completion of all tasks for this activity.

V. Consultant’s Profile

For the realization of the assignment one consultants is required.

Qualifications and specialized knowledge/experience required:

- The consultant is highly experienced, with hands-on knowledge of D-LeaP programs, in particular the UMT program, LSGU and PUCs’ functioning and management, including processes, procedures, organisational aspects, the current status of the utilities in the region and their challenges and needs, in the various specific areas related to the WSS sector.
- Experience in Capacity Development programs in the WSS sector
- Experience in Assets and Asset Management (including condition assessment, GIS implementation, investment planning) in a water-utility environment

In order to qualify as capable of performing the contract for public procurement in terms of its technical and professional qualifications, the consultant should meet the following minimum requirements:

Sector competence:

- Water-utility specific competences in Asset Management
- Utility analysis and strengthening
- Local and/or central governance, regulation
- Capacity Development programs and training delivery in the WSS sector (especially D-LeaP and RCDN programs)
- Experience with work of International Finance Institutions (IFIs)

- The consultant should demonstrate professional experience of at least 7 years in the areas mentioned above presented in her/his Curriculum Vitae (CV) and proved with corresponding references.

Regional experience:

- Working experience in South Eastern Europe and/or international

Language skills:

- Fluency in English
 - Fluency in at least one of the languages of the Region is an asset
 - IT skills: MS Office (Word, Excel, PowerPoint).
- The consultant should be reliable, confident, prompt, and highly flexible (due to a longer period of this assignment) and ready to travel in the region (at minimum for the face-to-face delivery of the program).

VI. Proposal

It must be highlighted that the applicants are expected to precisely demonstrate above-mentioned consultancy profile in their proposals. The consultant shall send an offer, including a proposed fee and their CV to: lavena@iawd.at, and in copy to: office@iawd.at, until **25 January, 2025**.

- CV of the consultant
- Proposed approach – a suggested workplan for activities, including a proposed time frame
- Financial offer shall contain the total budget for executing of the training including: (i) proposed number of days and (ii) daily rate per activity. The prices should be stated in EUR (gross amount).

VII. Evaluation Criteria and Scoring

The proposals will be evaluated based on the following criteria:

- 40% Consultants' Profile: Consultant's expertise and experience
- 30% Proposed approach
- 30% Financial Offer

VIII. Reference Person

The reference person for this assignment is the IAWD's Project Manager, Mr. Pietroantonio La Vena.

Email address: lavena@iawd.at

IX. Modification of Terms

IAWD reserves the right to modify the terms of the ToR at any time at its sole discretion.

X. Acceptance and Rejection of Proposals

IAWD may not necessarily accept the lowest priced proposal or any proposal. At its sole discretion, IAWD reserves the right to reject any or all proposals received and to accept any proposal which it considers

advantageous, whether it is the lowest priced proposal. IAWD is not under any obligation to award a contract and reserves the right to terminate the request for proposal process at any time, and to withdraw from discussions with the consultant who have responded. IAWD reserves the right to accept the proposed offer in total or in part, to reject any or all offers, to waive any minor informalities, irregularities, or technicalities, and to accept the offer deemed most favourable to the association and the RCDN.

XI. Ownership

All materials, documents and information prepared, developed, or adjusted by the consultant and used for the purposes of preparation and realisation of the activity, as well as reporting, remain the property of the IAWD and RCDN. The consultant agrees that no part of the training materials, documents and information may be reproduced or distributed in any form, or by any means, or stored in a database or retrieval system, for any other purposes and objectives than those related to this ToR, without the prior permission of IAWD.

XII. Reporting

The final report should be submitted, not later than 10 working days after the realisation of the activity, by the consultant.

XIII. Terms and Payment

The consultant will be hired under an Individual Contracts (IC), signed by IAWD and will be paid upon submission and approval of the deliverables listed above. Due to the longer period of this assignment, the consultant will receive an interim payment after a set of activities agreed with IAWD. The consultant shall provide the timesheets (that will be provided to the consultant by IAWD) together with the deliverables in order to proceed with the payment.

The payment will be based on the actual number of working days, including travel and accommodation cost, if any (according to the submitted timesheet) invested for the development of each deliverable, but not exceeding the approved number of days for the consultant.

*All abovementioned Annexes/Templates will be provided to the consultant by IAWD upon signing the contract.
